

31 January 2019

DECEMBER 2018 QUARTERLY ACTIVITIES REPORT

Aguia Resources Limited (ASX: **AGR**) (TSXV: AGRL) (“Aguia” or “Company”) is pleased to report on its activities for the December 2018 Quarter:

- The Company is preparing for the upcoming public hearing which is a final step in the permitting process of its flagship Três Estradas phosphate project
- Big Ranch drill program commenced in October; four target areas selected based on geological, geochemical and geophysical data
- Aguia closed a private placement financing for gross proceeds of A\$2,922,103.32

During the December 2018 Quarter (the “Quarter”), Aguia continued to focus on advancing its Três Estradas phosphate asset located in the state of Rio Grande do Sul in Southern Brazil (see Figure 1). The key activity at Três Estradas this Quarter was preparation for the upcoming public consultation, which is the final component of the Environmental Impact Assessment and successful completion of which will result in the granting of the Preliminary License. Aguia has also been engaged in ongoing exploration of Canhada and Big Ranch, a new zone of copper mineralization discovered earlier in 2018 (see Figure 2).

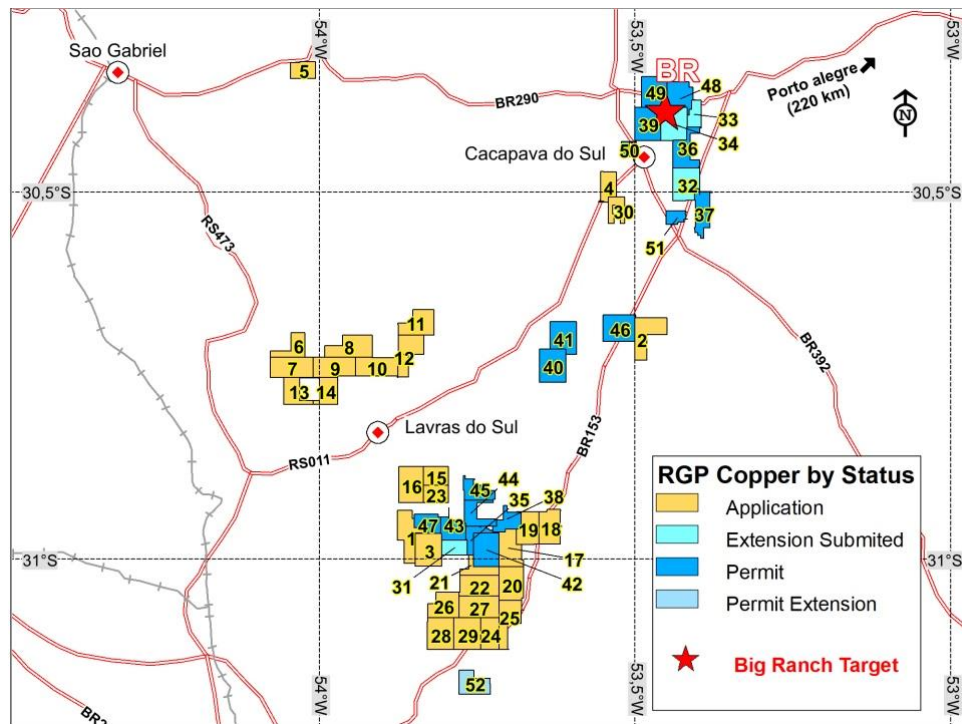

Figure 2: Rio Grande Copper Tenement Map – Refer to Tenement Register for License Details

Três Estradas Activity Focused on EIA Approval Process

Agua's Environmental Impact Assessment (EIA) was filed with the State Environmental Agency (FEPAM) in October 2016. Subsequently, engineering optimisations identified from trade-off studies resulted in modifications and improvements to the project and a revised version of the EIA was filed in September 2017. During the Quarter, FEPAM conducted a final site visit and Agua submitted a response that covered all remaining questions.

Subsequent to the Quarter end, FEPAM advised Agua that the public consultation hearing will take place in Lavras do Sul on March 20, 2019. Community consultation is the key final deliverable in the environmental permitting process for mining projects in Brazil. The event allows members of the community to attend a public forum about the Tres Estradas Phosphate Project at which any stakeholders can provide input, ask questions and voice their opinions. Agua's team in Lavras do Sul has undertaken an active community outreach program over many months in anticipation of this event. Activities have included education seminars, booths at agricultural fairs, workshops and other events. The response from the local community and government has been very positive to date.

Following the public consultation event, Agua will have completed all requirements to obtain the environmental permit (called the "Preliminary License" or "LP" in Brazil) and expects that the permit will be issued shortly thereafter. This will be a major milestone for the Company. The next phase of development will be obtaining the Installation Permit or "LI". The LI requires implementation of the programs and requirements prescribed in the LP to ensure Tres Estradas has a minimal impact on the environment and social wellbeing of the community. During this time, Agua will be finalizing the design and plans for the project site, negotiating offtake contracts and sourcing debt for construction. The LI is expected to take up to 12 months to obtain after which construction can commence.

Rio Grande Copper Exploration Continues

In the first Quarter of 2018, Agua announced the identification a new zone of copper mineralisation on ground staked within the Rio Grande Copper Belt, as a result of regional exploration activities in the State of Rio Grande do Sul, Brazil. The Company successfully secured a strategic land package along the Rio Grande Copper Belt, totaling 34,000 hectares across 23 tenements and identified two mineralised targets within the belt: Canhada and Big Ranch (see Figure 3 below).

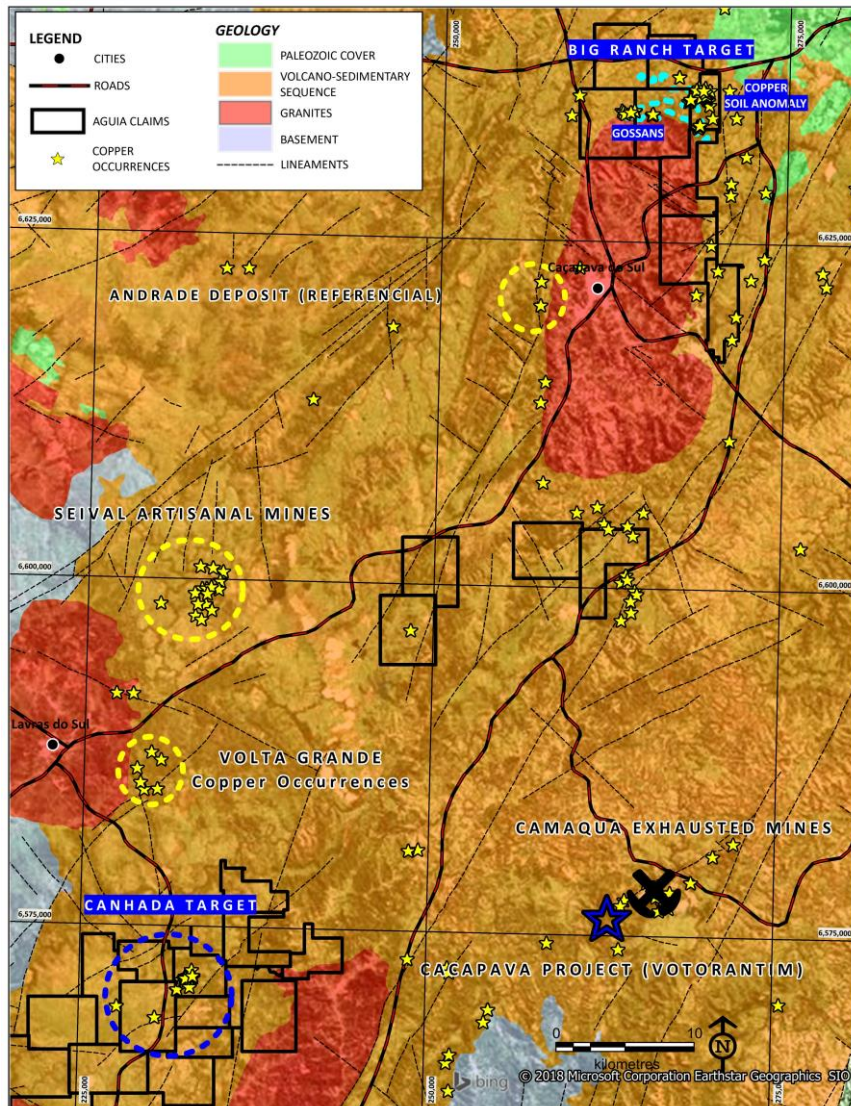

Figure 3. Regional geological map of the Rio Grande Copper Belt, highlighting the distribution of Agüia's Claims with the Canhada Target to the southwest of the belt and the Big Ranch Target to the northeast.

The **Canhada** target is located 20 km south of the City of Lavras do Sul, where Agüia has its field office, and consists of a 9 km-long by 3 km wide structurally-controlled trend within which a 2 km x 1 km airborne potassium anomaly (which remains open to the northeast) has been identified with an extensive coincident copper-in-soils anomaly in an area where multiple copper occurrences have been identified in bedrock by Agüia geologists. Mineralisation occurs as stockworks, veins and disseminated sulphides within the alteration zone. The potassium and associated hematite alteration is a characteristic of IOCG mineralised systems. The host sequence includes andesitic volcanic and pyroclastic rocks that have undergone intense hydrothermal alteration including albitization, cloritization, carbonate alteration and hematite alteration. Copper minerals are associated with potassic and hematitic alteration and include chalcopyrite, bornite, digenite and chalcocite, as well as malachite when weathered, typical of IOCG affinity mineralising systems. Soil sampling along this target will continue and in advance of a systematic exploration program that will include a ground induced polarization ("IP") survey followed by a scout reverse circulation drilling campaign.

The **Big Ranch** target is located along the northern edge of the Caçapava Granite and consists of a 6km x 2km zone that was initially identified as an airborne geophysical anomaly. More specifically, Agüia's technical team noticed the anomaly because it is a zone with no airborne radiometric count. These zones are rare and only a few rocks exhibit this signature.

During the Quarter, Agua commenced a 3,000 metre diamond drilling program at the Big Ranch copper prospect. The main purpose of this campaign is to acquire more data on the geology and nature of the hydrothermally altered rocks at depth, which will provide the necessary information for a more accurate interpretation of the copper and base metals showings identified so far.

Agua identified four Target Areas to be tested in this drilling program (Figure 4). Target Areas 1 to 3 were selected from the geological, geochemical and geophysical data, while Target Area 4 is essentially a geophysical target.

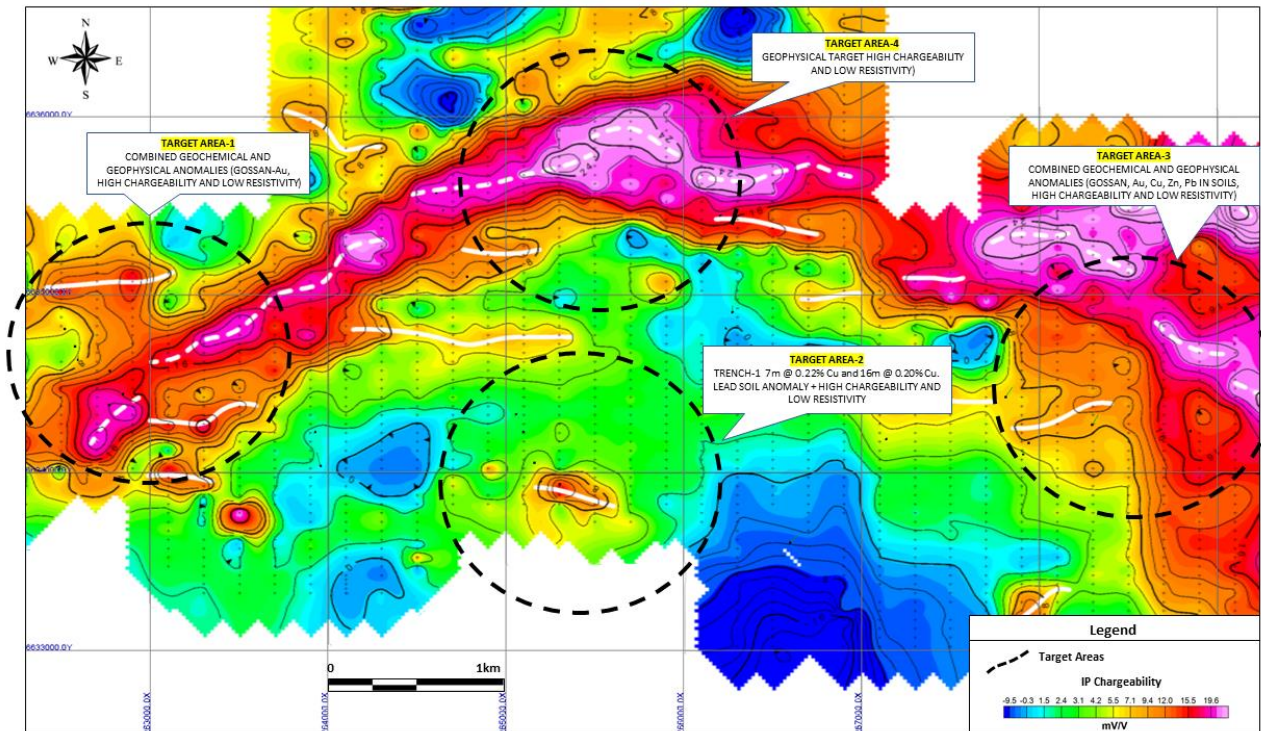

Figure 4. Induced Polarization Chargeability map of the Big Ranch Target highlighting the four Target Areas that will be drilled in the current campaign.

The surrounding geological environment is highly prospective and includes the past producing Camaqua copper mine, a new Zn-Pb project currently being licensed by Nexa Resources (Votorantim Group), and the Andrade copper deposit owned by Brazilian-based Referencial.

Assay results from the Big Ranch drilling are expected to be available during the March Quarter.

Meanwhile, further progress was made on the exploration of the Canhada Target with the completion of a ground geophysics program. Data collected from the survey is now being analyzed and as with Big Ranch will be used to develop a better understanding of the rock at surface in order to efficiently target further exploration at depth.

Lucena Phosphate Project

The Lucena Phosphate Project, comprised of 45 tenements and applications for 268.1km², contains an initial JORC compliant Inferred Mineral Resource of 55Mt grading 6.42% P₂O₅ in the state of Paraiba in north eastern Brazil. A feature of the Lucena tenement is outcropping limestone, which is a potential commercialisation opportunity given the presence of a number of cement plants in the region. There was no activity during the Quarter.

Mata da Corda Phosphate Project

There was no activity during the Quarter.

Corporate Activity

Prior to the end of the Quarter, Aguia announced that it had closed a private placement financing for gross proceeds of \$2,922,103.32. These funds were raised in connection with the issuance of 24,350,861 ordinary shares (the "Ordinary Shares") via a non-brokered private placement to sophisticated and institutional investors at a price of \$0.12 per Ordinary Share (the "Placement").

The Company intends to use the proceeds from the Placement as follows:

- Ongoing exploration of the Rio Grande Copper prospects (Big Ranch and Canhada) to include drilling and assays;
- Evaluation and acquisition of additional properties around Big Ranch and Canhada;
- Finalization of environmental permitting for the Três Estradas phosphate deposit including public hearings to obtain the Preliminary License;
- Strengthening the balance sheet; and
- Lease maintenance and general working capital purposes.

Plans for the March Quarter

The key activity during the March Quarter will be the public consultation for Três Estradas on March 20, 2019. Aguia's team in Lavras do Sul is fully engaged in preparations for the public hearing and support for the project locally is very positive.

Drilling of the new copper mineralisation targets in the Rio Grande Copper belt will continue in the March Quarter with results to be reported as assays are received.

About Aguia:

Aguia Resources Limited, ("Aguia") is an ASX and TSXV listed company whose primary focus is on the exploration and development of mineral resource projects in Brazil. Aguia has an established and highly experienced in-country team based in Belo Horizonte, Brazil with corporate offices in Sydney, Australia. Aguia's key projects are located in Rio Grande do Sul, a prime farming area which is 100% dependent on phosphate imports. The Rio Grande phosphate deposits exhibit high quality and low cost production characteristics, and are ideally located with proximity to road, rail, and port infrastructure. Aguia's experienced management team has a proven track record of advancing high quality mining assets to production in Brazil.

Qualified Person

The technical information in this press release has been reviewed and approved by Dr Fernando Tallarico, who is a member of the Association of Professional Geoscientists of Ontario, Technical Director for Aguia and a Qualified Person as defined by National Instrument 43-101.

Caution regarding forward-looking information:

This press release contains "forward looking information" within the meaning of applicable Canadian securities legislation. Forward looking information includes, without limitation, statements regarding the next steps for the project, timetable for development, production forecast, mineral resource estimate, exploration program, timetable and budget, property prospectivity, and the future financial or operating performance of the Company. Generally, forward looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including, but not limited to: general business, economic, competitive, geopolitical and social uncertainties; the actual results of current exploration activities; other risks of the mining industry and the risks described in the Company's public disclosure. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

JORC Code Competent Person Statements

The Três Estradas Phosphate Project has a current 43-101/JORC compliant measured and indicated mineral resource comprising 83.210 million tonnes grading 4.11% P₂O₅ and 21.845 million tonnes of inferred resource grading 3.67% P₂O₅.

The Lucena Phosphate Project has a current JORC compliant inferred mineral resource of 55.1Mt grading 6.42% P₂O₅.

Information in this report is extracted from the following reports, which are available for viewing on the Company's website:

- *January 14, 2019: Aguia Enters Final Phase of Três Estradas Environmental Permitting*
- *December 18, 2018: Aguia Closes Private Placement*
- *November 29, 2018: Aguia Evaluating Options to Unlock Value of Rio Grande Copper Assets*
- *November 13, 2018: Update on Big Ranch Drilling and Três Estradas Permitting*
- *October 11, 2018: 3,000 Metre Diamond Drilling Program Underway at Big Ranch*
- *27 February 2018: Aguia Identifies Zone of Copper Mineralisation Within 9km Target Area in Rio Grande do Sul, Brazil*

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements listed above and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Fernando Tallarico, who is a member of the Association of Professional Geoscientists of Ontario. Dr Tallarico is a full-time employee of Aguia Resources Limited. Dr Tallarico has sufficient experience which is relevant to the style of mineralisation and type of deposit under

consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves ("JORC Code")'. Dr Tallarico consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
