### **Management Commentary**

**Managing Director Dr. Fernando Tallarico said:** *"We are very pleased with the result of the placement and are pleased to welcome new shareholders to the register who are aligned with the long-term strategy of Aguia, along with a number of existing shareholders who have made additional investment in the Company. Further, we are excited to provide all existing shareholders with the opportunity to make additional investment in Aguia on the same terms as the Placement through the SPP. I encourage all eligible shareholders to view the SPP offer document and consider participating."*

*"Whilst our plans to move the Três Estradas Phosphate Project into production have been delayed and although work continues on the project and development of Pampafos®, as previously announced, Aguia's positioning as a multi-commodity company has allowed us to pivot more focus to further exploration of our highly prospective Andrade Copper Project and satellite copper targets. We look forward to updating our shareholders on the results of this well-funded drilling campaign."*
