UPDATE ON CONCILIATION PROCEEDINGS: PUBLIC CIVIL ACTION

Sydney, Australia - Aguia Resources Limited (ASX:AGR) ('**Aguia**' or the '**Company**') has two advanced mining projects in southernmost Brazil: cathode green copper and organic phosphate. Both projects are 100% owned.

This is to elaborate on the recent news Aguia shared on the attempt to reach a settlement in the Public Civil Action (PCA) involving Aguia and regarding the environmental licensing for our Phosphate Project.

As reported last week, even though Aguia is confident that the allegations made in the PCA are groundless, it is in the company's best interests to reach a settlement.

This is why Aguia is actively engaged in a conciliatory process with all of the parties to the PCA to be able to close the case as soon as possible.

In the first conciliation hearing that took place last week, the parties expressed their commitment towards moving to settle the case, which Aguia views as a positive development. It is not unusual in these type of proceedings for there to be one or more conciliatory hearings.

The negotiations are ongoing, and parties are expected to meet again to discuss the terms of a possible settlement within the next few days.

As mentioned, this is an important step towards Aguia's goal to end the litigation and move forward with the implementation of the Phosphate Project. Aguia is confident that reaching a settlement will enable the company to soon commence construction.

In the meantime, Aguia is actively engaged in taking steps to prepare for construction, including:

- The Project Manager has been appointed and has already moved with his family to the region;
- The company has appointed the Australian mining consultancy firm Harrier in an advisory role to the project to provide independent oversight to the Board. Harrier has strong links to experienced mining personnel in Brazil;
- The company has appointed a highly experienced sales team with 35 years of experience in agricultural sales and marketing;
- Work has recently been completed on clarifying sourcing agreements, confirming supply chain stability, the availability of materials and equipment and updating prices as part of the preparation for the updated Banking Feasibility Study (BFS); and
- The BFS is expected to be announced in early March.

We will keep you informed of the next steps.

About Aguia:

Aguia Resources Limited ("Aguia") is an ASX-listed multi-commodity company (AGR:ASX) with pre-production phosphate and metallic copper projects located in Rio Grande do Sul, the southernmost state of Brazil. Aguia has an established and highly experienced in-country team based in Porto Alegre, the capital of Rio Grande do Sul. Aguia is committed to advancing its existing projects into production whilst pursuing other opportunities within the sector.

JORC Code Competent Person Statements:

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr. Fernando Tallarico, who is a member of the Association of Professional Geoscientists of Ontario. Dr. Tallarico is a full-time employee of the company. Dr. Tallarico has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr. Tallarico consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Caution regarding forward-looking information:

This press release contains "forward looking information" within the meaning of applicable Australian securities legislation. Forward looking information includes, without limitation, statements regarding the next steps for the project, timetable for development, production forecast, mineral resource estimate, exploration program, permit approvals, timetable and budget, property prospectivity, and the future financial or operating performance of the Company. Generally, forward looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including, but not limited to: general business, economic, competitive, geopolitical and social uncertainties; the actual results of current exploration activities; other risks of the mining industry and the risks described in the Company's public disclosure. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities law.
