UPDATE ON CONCILIATION PROCEEDINGS: PUBLIC CIVIL ACTION

Sydney, Australia - Aguia Resources Limited (ASX:AGR) ('**Aguia**' or the '**Company**') has two advanced mining projects in southernmost Brazil: metallic green copper and organic phosphate. Both projects are 100% owned.

Aguia is pleased to share the developments of the settlement negotiations in the Public Civil Action involving Aguia and regarding the environmental licensing for our Phosphate Project.

As reported, following the conciliation hearing, the parties met again today to further discuss a settlement. The meeting was very successful as the parties reached several consensuses, and Aguia agreed to undertake additional steps related to communicating with the local population on the project.

The parties are now expecting the presentation of a supplementary technical report by the Public Prosecutor's Office technical team this week. Such report will be discussed in the next settlement hearing to be scheduled for mid-March. Once that happens, the company expects to be closer to a written settlement that would end the litigation altogether and allow the commencement of construction.

In the meantime, Aguia is actively engaged in taking steps to prepare for construction, including:

- The Project Manager has been appointed and has already moved with his family to the region;
- The company has appointed the Australian mining consultancy firm Harrier in an advisory role to the project to provide independent oversight to the Board. Harrier has strong links to experienced mining personnel in Brazil;
- The company has appointed a highly experienced sales team with 35 years of experience in agricultural sales and marketing;
- Work has recently been completed on clarifying sourcing agreements, confirming supply chain stability, the availability of materials and equipment and updating prices as part of the preparation for the updated Banking Feasibility Study (BFS); and
- The BFS is expected to be announced during March.

Again, Aguia is actively employing its best efforts to reach a solution soon, which seems more likely with every meeting, and will keep you informed of the next steps.

**AUTHORISED FOR ISSUE TO ASX BY CHRISTINA MCGRATH,
EXECUTIVE CHAIR OF AGUIA RESOURCES LIMITED**

About Agua:

Agua Resources Limited ("Agua") is an ASX-listed multi-commodity company (AGR:ASX) with pre-production phosphate and metallic copper projects located in Rio Grande do Sul, the southernmost state of Brazil. Agua has an established and highly experienced in-country team based in Porto Alegre, the capital of Rio Grande do Sul. Agua is committed to advancing its existing projects into production whilst pursuing other opportunities within the sector.

JORC Code Competent Person Statements:

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr. Fernando Tallarico, who is a member of the Association of Professional Geoscientists of Ontario. Dr. Tallarico is a full-time employee of the company. Dr. Tallarico has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr. Tallarico consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Caution regarding forward-looking information:

This press release contains "forward looking information" within the meaning of applicable Australian securities legislation. Forward looking information includes, without limitation, statements regarding the next steps for the project, timetable for development, production forecast, mineral resource estimate, exploration program, permit approvals, timetable and budget, property prospectivity, and the future financial or operating performance of the Company. Generally, forward looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including, but not limited to: general business, economic, competitive, geopolitical and social uncertainties; the actual results of current exploration activities; other risks of the mining industry and the risks described in the Company's public disclosure. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities law.
